

Victor Oyebanji

Frontend Developer | [React.js](#) | [JavaScript](#) | [Tailwind CSS](#)

Portfolio: [victorbanji.vercel.app](#) | [github.com/Victoza](#)

Remote (UTC+1) | oyebanjivic@gmail.com | +234 707 034 0207 | linkedin.com/in/victor-oyebanji-dev

PROFESSIONAL PROFILE

Frontend Developer with hands-on experience building responsive, accessible web applications using React.js, JavaScript (ES6+), HTML5, CSS3, and Tailwind CSS. Comfortable with REST API integration, reusable component architecture, state management, client-side routing, and shipping projects from development to deployment.

Works well across design and development workflows. Takes product requirements and design mockups and turns them into clean, working interfaces that hold up across devices and screen sizes. Pays close attention to performance, cross-browser consistency, and usability.

Currently building skills in: TypeScript | Next.js | Web Accessibility (WCAG) | Frontend Testing (Jest, React Testing Library)

TECHNICAL SKILLS

Languages: JavaScript (ES6+) | HTML5 | CSS3 | TypeScript (in progress)

Frameworks & Libraries: React.js | Next.js (in progress) | Tailwind CSS | React Router DOM | Axios

State Management: Context API | Zustand

Testing & Quality: Jest (in progress) | React Testing Library (in progress) | Debugging | Cross-Browser Compatibility

Accessibility: Web Accessibility (WCAG) | Semantic HTML | Mobile-First Development | Responsive Web Design

Tools & Workflow: Git | GitHub | Vite | npm | VS Code | Vercel | REST API Integration | Component-Based Architecture

PROFESSIONAL EXPERIENCE

Frontend Developer Intern [Nexus Fellowship](#)

Remote | Jan 2026 – Present

- **Odore project:** Built and shipped Odore, a perfume branding landing page, as the sole frontend developer on the project. Handled everything from component structure to final deployment on Vercel.
- **Reusable components:** Created a library of 15+ reusable React components including navbars, hero sections, product displays, and promotional blocks. Cutting build time on repeated UI work.
- **Responsive layouts:** Built responsive page layouts for desktop, tablet, and mobile across 4+ pages per project using Tailwind CSS. Layouts held up consistently across screen sizes without extra fixes.
- **Design to code:** Worked from design references to produce interfaces that matched the intended look and feel across 2 shipped projects, keeping spacing, typography, and visual structure consistent throughout.
- **Version control:** Used Git and GitHub for version control across all projects. Kept commit history clean and worked within team branching workflows.

- **Bug fixing:** Fixed layout bugs and responsiveness issues through regular testing and code review. Improved the quality and consistency of UI output over time.

PROJECT EXPERIENCE

Fashion Fuxion - E-commerce Web Application

Tech Stack: React.js | Tailwind CSS | Context API | [\[https://fashion-fuxion.vercel.app/\]](https://fashion-fuxion.vercel.app/)

- **What it covers:** Built a 3-page shopping application with product listings, individual product pages, category filters, a cart system, and quantity controls.
- **State management:** Used Context API to manage cart state and product data across 4 components without prop drilling.
- **Code structure:** Structured 10+ reusable components with mobile-first layouts in Tailwind CSS. Kept the codebase organised for easy updates.

Agric-Premium - Agricultural Services Website

Tech Stack: React.js | Tailwind CSS | [\[https://agric-premium.vercel.app/\]](https://agric-premium.vercel.app/)

- **Project scope:** Built a full corporate website with at least 5 sections: landing page, product showcase, appointment booking, and a blog. Handled the project independently from setup to deployment.
- **Accessibility:** Followed WCAG accessibility guidelines and mobile-first design throughout. The site works well across all major device sizes.

Personal Portfolio - Developer Showcase

Tech Stack: React.js | Tailwind CSS | Vite | Vercel | [\[victorbanji.vercel.app\]](https://victorbanji.vercel.app/)

- **Live site:** Designed and built a live portfolio site showing 4 projects, technical skills, and work history. Deployed on Vercel and kept up to date.
- **Structure:** Built 4+ reusable UI components with clear navigation. The site gives hiring managers a straightforward view of the work.

EDUCATION

Bachelor of Engineering (B.Eng.) - Mechatronics Engineering [Federal University Oye-Ekiti](#)

Nigeria | 2017 – 2023

An engineering background that built strong habits around logical thinking, attention to detail, and working through technical problems systematically. These carry over directly into frontend work.
